Stocks of Grains in All Positions

U. S. DEPT. OF AGRICULTURE
NATIONAL AGRICULTURAL LIBRARY
OCT 11 1963
CURRENT SERIAL RECORDS

April 24, 1963

SMALLER APRIL 1 STOCKS OF GRAINS AND SOYBEANS

Grain stocks on April 1, 1963 were smaller with total stocks of feed grains and all wheat each 8 percent less, and soybean holdings 3 percent less than a year ago, according to the Crop Reporting Board. For the feed grains, corn stocks were 10 percent less than a year earlier, sorghum holdings were 3 percent smaller while oats stocks were practically the same. Stocks of all wheat were below last year and the smallest since 1958, but durum wheat holdings were nearly five times the extremely low level of last year. Soybean stocks dropped below the record high of April 1 last year.

All wheat stocks of 1,503 million bushels stored in all positions were 8 percent below a year earlier but 6 percent more than the 1957-61 average. Stocks were the smallest for the date since 1958. Farm stocks of wheat were 10 percent less than the April 1 average, while off-farm stocks were 8 percent above average for April 1. Disappearance of all wheat in the January -March quarter, at 314 million bushels, was 8 percent smaller than in the same quarter a year earlier. More than 80 percent of the total stocks were either owned by the Government or were under Government loan.

Durum wheat stocks were estimated at 58.3 million bushels compared with 65.9 million bushels on January 1 and 12.7 million bushels on April 1. last year.

Rye stocks of 15.4 million bushels were 5 percent larger than on April 1 a year earlier but 4 percent less than average for the April 1 date. Commercial positions held 51 percent of the total and farm storages 48 percent. Holdings in Commodity Credit Corporation bins made up only 1 percent of the stocks, although nearly 30 percent of the rye stocks were either owned by or under loan to CCC. Disappearance during the January-March quarter was 8.4 million bushels, about 75 percent larger than the amount in the same quarter a year earlier and 44 percent larger than the average January-March quarterly disappearance.

Corn held in all storage positions on April 1 totaled 3,040 million bushels--10 percent less than a year earlier, 1 percent less than average and the smallest April 1 stocks in four years. Farm stocks of 2,002 million bushels, about two-thirds of the all stocks total, were 7 percent smaller than the record high of 2,149 million bushels last year. Off-farm stocks of 1,038 million bushels were 16 percent less than on April 1 last

UNITED STATES DEPARTMENT OF AGRICULTURE

Washington, D. C.
CrLg 11 - 1 (4-63)

year. Corn held in mills, elevators, and warehouses was 29 percent less than last year while the quantity held in CCC storages was 2 percent larger. More than four-fifths of the off-farm stocks were owned or under loan to CCC and more than two-fifths of the farm stocks were under Government loan, including reseals and purchase agreements.

The indicated disappearance of corn during the January-March quarter of 1,184 million bushels established a new record, nearly 7 percent larger than the previous high for the same quarter last year.

Oats stored in all positions on April 1, 1963 totaled 494 million bushels, approximately the same as last April but 11 percent below the 5-year average. April 1 stocks on-farms totaled 432 million bushels, while off-farm stocks totaled 62 million bushels, about the same as a year earlier. Of the total stocks, about one-tenth was under Government loan or ownership. Disappearance during the past quarter totaled 284 million bushels, slightly larger than the 280 million bushel disappearance for this same period in 1962, which was the smallest for this period since records were started in 1944.

Barley stocks in all storage positions totaled 232 million bushels, 7 percent larger than the 217 million bushels a year earlier, but 7 percent smaller than the average. Of the total stocks, 129 million bushels, or 56 percent, were located on farms while 103 million bushels were in off-farm positions. Barley owned by or under loan to CCC accounted for one-third of the total stocks. Disappearance during the January-March period totaled 110 million bushels, 7 percent less than for this period last year.

Sorghum grain stocks in all positions on April 1, 1963 totaled 826 million bushels, 3 percent less than a year earlier and 4 percent below the record for this period of 860 million bushels in 1961. Off-farm stocks of 725 million bushels were 6 percent smaller than on April 1 last year, but on-farm stocks of 101 million bushels were 21 percent larger. Over 80 percent of the April 1 stocks were owned by or under loan to CCC. Disappearance of grain sorghum from all positions during the January-March period totaled 197 million bushels, 10 million bushels more than for this quarter last year.

Soybean stocks in all storage positions on April 1 totaled 344 million bushels, 3 percent less than the record 356 million bushels on hand a year earlier. All of the decrease occurred in farm holdings as off-farm stocks were larger than a year ago.

April 1 stocks indicate a disappearance during the 6-month period October 1962-March 1963 of 389 million bushels from a supply of 733 million bushels (carryover of 58 million bushels plus 1962 production of 675 million bushels). During the period 249 million bushels were processed for oil and about 106 million bushels were exported. In addition, some new crop beans were crushed and some were exported prior to October 1 and minor quantities have been fed to livestock during the 6-month period.

(Continued from page 2)

Flaxseed stocks in all storage positions on April 1 totaled 18.6 million bushels, almost twice as much as holdings a year earlier. Off-farm stocks were more than double a year earlier, while farm stocks were up 68 percent from April 1, 1962.

April 1 stocks indicate a disappearance during the July 1962-March 1963 period of 17 million bushels from a supply of 35.6 million bushels (carryover of 3.6 million plus the 1962 production of 32 million bushels). During the period 3.5 million bushels were exported and 15.6 million bushels were processed.

The data in this report are assembled by the Crop Reporting Board, bringing together stocks of CCC owned grains reported by the Agricultural Stabilization and Conservation Service as stored in bins, ships, and other storages under CCC control and estimates of the Crop Reporting Board for stocks on farms and at mills, elevators, warehouses, terminals, and processors.
